

GAS PLANCHA HIGH-TEMP COOK SURFACE

Job Name	Chipotle
Model	WS-PL-4836-4-CT-RIGHT
Item#	

The Wood Stone Gas Plancha features a small footprint that measures 48 inches x 35 inches with a smooth steel cooking surface 48 inches x 24 inches. Supported by four legs, it is intended for installation on a suitable countertop or on the optional stand available from Wood Stone.

The surface of the Gas Plancha can be used as a direct contact cooking surface like a griddle for searing or sauteing, or heated up to 750° F so that it functions more like an open burner or French Top.

The cook surface is divided into two zones, a main zone and a smaller zone separated by a divider that can be used for specialty items. Specify left or right for the preferred divider location. Each zone is equipped with its own temperature control. On this model, the temperature control knobs are located behind a removable cover. The plancha utilizes a proprietary control system developed by Wood Stone which provides even temperature control across the entire cook surface with no heat-recovery issues.

The Gas Plancha arrives completely assembled, ETL Listed, ready to install, and is made in the USA.
